

Creating a Remote Printer

Please note: These parameters are from a Citizen dealer; we (Citizen Systems) are unable to support these in any way. They are provided as a guide only.

Enter command CRTOUTQ to create a remote output queue on AS400.

Enter the following parameters:

Output queue Library	Printer name e.g. PRT20 QUSRSSYS
Remote system	*INTERNETADR
Remote printer queue	PORTLF1
Writers to autostart	1
Connection type	*IP
Destination type	*OTHER
Manufacturer type and model	*WSCST
Workstation customizing object Library	QWPDEFAULT QSYS
Internet address	IP address e.g. 199.5.83.6
Destination options	XAIX XAUTOQ

For all other parameters you can accept the defaults given.
